

New Automated Anytime Conference Calling with CTC

*Bowdoin College
Telecom has found a
more affordable and
easier conference
calling service with
CTC
Communications*

Automated anytime conferencing simplifies your communications by giving you the convenience of a teleconference call without having to make a reservation. Using a toll-free number that has been exclusively assigned to Bowdoin College, and by obtaining a passcode exclusively issued to your department, you can instantly conduct conferences 24 hours a day, 7 days a week, whenever you need it—at a fraction of the cost of former teleconferencing services.

Participants dial directly into a “digital bridge” and enter the same pre-assigned passcode using their touch-tone phone. Participants who do not have the passcode will not be able to enter the conference and will be forwarded to one of CTC Communications operators.

To obtain a passcode for your Department and your teleconference participants, call Lueree Horton in CIS/Telecom at 725-3966. Or e-mail your Department Name and Bowdoin Departmental Billing Account Number to: lhorton@bowdoin.edu
